

Technical Specification

The FORCE-115 Plus is ideally suited for construction or quarrying. This compact drill rig navigates steep climbs and rough terrain efficiently. Servicing requires just one person and is quick and easy to perform. The FORCE-115 Plus requires just one operator. It manoeuvres rough terrain with ease. Operation is smooth thanks to its two independent air motors and dynamic braking system. The rig can be interchanged between Down-The-Hole and top hammer drilling to meet different application needs. The machine is compact, enabling convenient transportation over long distances.

Conversion kit is available to toggle between DTH and top hammer drilling. Top hammer drill is provided with BBC120F rock drill which gives high performance consuming less air.

Parameters	Specification
Hole size range	75mm - 115 mm / (3" – 4.75 inch)
Max Hole Depth	27.5 m (90 feet)
Air Compressor capacity	550 cfm @ 200 psi
Rotary Head speed	80 rpm
Tramming speed	3.0 km/hr
Gradeability	30 %
Ground clearance	250 mm
Bare Drill weight	2700kg
Operating weight	3000kg

Maintenance

- Easy To Use
- Lower Cost to Maintain with a Good Durability

Service

- Quicker and Better After-Sales-Service
- Buyer Technical Support Program
- Dealer Marketing Support Program

Design

- Operator Friendly Function Enabled
- Well-Balanced Frame with Fewer Components
- This compact drill rig navigates steep climbs and rough terrain efficiently.

Performance

- Outstanding Power to Weight Ratio
- High Performance with Qualified Control Valve
- Top Class “Less Noise” (Box Frame Type)
